

Fixed Video Surveillance

Edge Video Solutions

Video stored at the edge, available on-demand

RSU-3 Video Storage System

The Remote Storage Unit provides at-the-edge decentralized event processing & storage of video surveillance using IP cameras and advanced IP software. The RSU-3 features up to 2TB storage in a pole mount, wall mount or rapid deploy configuration in a NEMA 3X package.

Each RSU will support 6 IP cameras, 4 POE connections with 3G/4G Cellular Modem, 8 port Managed Switch and options for Fiber and Access Point. The RSU-3 can support more than 6 cameras when using the Access Point option.

For very hot or cold climates a sun shield and heater system is available.
