REMOTE VIDEO SURVEILLANCE STORAGE SYSTEM

At the Edge NAS BOX

- Supports 4 IP Cameras
- Includes 8 Port Switch
- Cameras can be separated from box up to 300 ft using Power over Ethernet
- 3G Data Modem
- NAS Restart Relay
- NAS Battery Back Up
- X RAID 2 TB
- Internal Fan
- Internal Heater Option
- Thermostat Controlled
- Dual 12 V/48VDC Power Supply
- Custom Shelf
- NEMA 3R IP42 Rated
- 14" x 12" x 7"
- Outdoor day/night/IR cameras
- Windows based software
- Optional Solar Shield & Solar Powered DC Fan is available

The modem can support up to 5 port forwarding addresses thus 4 IP Cameras. An optional remote IP sense of temperature and alarms is available

The NAS Box coupled with **IPVisionSoftware** provides at-the-edge surveillance utilizing outdoor rated IP Cameras with electronic PTZ plus two way voice. The NAS Box supports 2 TB Raid Storage, an internal 3G Modem, 8 Port Switch with POE plus an internal Fan and Heater system for hot and cold climates.

To use, hang the NAS box on a pole or wall, plug in the AC cord and attach up to 4 IP cameras. **That's it!**

When a programmable event occurs, **IPVisionSoftware** Windows -friendly software sends escalating alert notifications and JPG images to dispatch. Dispatch can then respond to the alarm, stand down the alarm, or pull the stored video on demand.

This approach reduces the airtime cost of video transmission, conserves limited 3G Bandwidth and prevents dispatch from missing an important event.

In addition security vehicles can remotely view the live video stream through their in-vehicle computer, web browser and 3G modem.

The storage system can be configured for low current draw using 1 TB storage and a solar powered DC Fan. Cold Climate systems can utilize the built-in thermostat controlled heater block

Up to 4 Mobotix Cameras can be connected via POE to the storage box

Mount the storage system to Wall or Pole
